TABLE OF CONTENTS

1.	INTRODUCTION1
2.	GLOSSARY OF TERMS1
3.	ABBREVIATIONS & ACRONYMS

1. INTRODUCTION

This supplement to the Lords of the Earth rules set provides a collected set of terms and abbreviations used in the game.

BR	Basic Rulebook
ME	Modern Era supplement
FUT	Space Age supplement
GM	GM Rulebook
CMBT	Combat Module
xSTATS	xSTATS document

2. GLOSSARY OF TERMS

Term & Definition

Term & Demintion	Book
Action Points (AP): the measure of both	BR
the capability of a Leader to perform actions	DIC
and the cost of attempting those actions.	
Actions: the codification of possible	BR
activities that your national Leaders (Kings,	
Princes, Lieutenants, etc.) can attempt in a	
turn.	
Aerial Trade: A new Trade Route type	ME
available to Industrial Merchant Houses with	
airship technology.	
Aerostat: A lighter than air craft, usually	FUT
rethered.	
Agro: a measure of edible foodstuffs	BR
produced or consumed by your nation in the	
course of a turn.	
Aircraft: Flying Machines with a rigid-	ME
airframe and one or more fixed wings and	
gasoline-burning engines to drive propellers.	
Airport: a new Monolithic Construction that	ME
Merchant House can use to support Aerial	
Trade.	
Airships: A class of units for Industrial	ME
nations, representing lighter-than-air craft.	
Airship units run the gamut from small	
cout craft to giant Graf Zeppelin-style aerial	
passenger ships	
Anchor' Cities: A controlled port city that	ME
orms one end of a Trade Conduit	
connecting it to one or more other	
controlled port cities.	
Anti-Ballistic Missile: Any antimissile	FUT
system designed to counter ballistic missiles.	
However the term is more commonly used	
for ABM systems designed to counter long	
range, nuclear-armed intercontinental	
pallistic missiles (ICBMs).	
Antipodal: A location on the opposite side	FUT
of the globe.	
Arcology: A massive city built in three	FUT
dimensions reducing urban sprawl and the	
ecological footprint of the city.	
Artillery : A new unit type for the Modern	ME

Term & Definition	Rule
Term & Delinition	Book
Era, composed of cannons, bombards and	Dook
other field pieces firing shot or canister with	
gunpowder propellant.	
Asteroid: A large piece of space debris. The	FUT
greatest concentration are found in the	
Asteroid Belt beyond Mars, but a significant	
number orbit the sun closer in and include a	
number of families of Near Earth asteroids.	F1 77
Asteroid Fortress: An asteroid moved to a	FUT
useful location and converted into a fortress. These have the benefit of intrinsic 'wall	
points' derived from the rock itself.	
Asteroid Habitat: An asteroid moved to a	FUT
useful location and modified to allow the	101
core to be used as a space colony.	
Ballistic Missile: A ballistic missile follows	FUT
a prescribed course that cannot be altered	
after the missile has burned its fuel, its	
course is governed by the laws of ballistics.	
In order to cover large distances ballistic	
missiles must be launched very high into the	
air or in space, in a sub-orbital spaceflight;	
for intercontinental missiles the altitude	
halfway is ca. 1200 km. When in space and	
no more thrust is provided, the missiles are	
freefalling. Base Port : the home harbor of the MSP	BR
assigned to a trade route. This need not be	DK
the Port of Origin used for tracing the trade	
route.	
Battlesuit: An advanced armored suit with	FUT
mechanical and electronic mechanisms	
designed to augment the wearer's abilities.	
Biological Warfare: The use of bacteria,	FUT
viruses or other disease-causing organism as	
a weapon. Also known as germ warfare.	
Bioweapon: See Biological Warfare.	FUT
Branch Office: Represents a substantial	ME
economic interest in a given location (a city	
or region) by a Merchant House.	D.D.
Bureaucratic Level (BL): a measure of the	BR
effectiveness and sophistication of your government. This rating also controls the	
number of Leaders that your nation can	
generate.	
Cargo Mass Points: The size/mass of	FUT
asteroids and material mined from the Moon	
or an asteroid.	
Cargo Points: a measure of the capacity of	BR
a ship to carry cargo and the cost against	
that capacity of things to be carried.	
Cartel City : A city that is under the direct	\mathbf{ME}
economic domination of a Merchant House.	
Chemical Warfare: Warfare employing the	FUT
toxic properties of chemical substances to	
kill or incapacitate an enemy.	DП
Civil War: the state of hostilities resulting	BR
from the split of a nation's Leadership into one or more factions. Often the result of a	
Dynastic Failure.	
Dynastic I andre.	

Term & Definition	Rule Book	Term & Definition	Rule Book
Combat Leader: The Leader of an Army, a	ME	Game Master (GM): the moderator of the	BR
Fleet, Air Wing or Flight based on an Army	1412	campaign. This hapless fellow gets the	DIX
Operations Point, a Naval Operations point		thankless job of consolidating player orders,	
or an Air Operations point.		processing the turn, answering a lot of	
Conduit Limit: The maximum number of	ME	questions and getting results out. In a sense,	
Trade Conduits that can comprise a single		the 'god' of the campaign world.	
Sea Trade Route. Not a limit on the total		Geostationary Orbit: A circular orbit	FUT
number or length of Trade Routes a Nation		directly above the Earth's equator (0°	
may have, however.		latitude).	
Control Radius: a measure of the maximum	BR	Geosynchronous Orbit: A geocentric orbit	FUT
geographic distance that your government		that has the same orbital period as the	
can administer from the capital. This is in		sidereal rotation period of the Earth. It has a	
terms of Action Points. It is based upon		semi-major axis of 42,164 km (26,200 miles).

units.		Zones reaching from the national Capital to	
Infrastructure (Infra) : a measure of the	BR	an outlying province. If the LOC is traced by	
capacity of your national government to rule		sea, then it must go through a controlled,	
provinces and cities. The higher it is, the		un-blockaded Port City before it may	
more provinces and cities that can be		enter/exit a Sea Zone.	
governed effectively.	DD	Low Earth Orbit: (LEO), an orbit around	FUT
Intel Ratings: the capability of your nation to undertake various covert activities like	BR	Earth between the atmosphere and the Van Allen radiation belt, with a low angle of	
gathering information about your enemies		inclination. These boundaries are not firmly	
and attempting to murder their commanders		defined but are typically around 200 - 1200	
(also called Espionage Ratings).		km (124 - 726 miles) above the Earth's	
Intercontinental Ballistic Missile:	FUT	surface. This is far below geostationary orbit.	
(ICBM), a very-long-range (greater than		Lunar Outpost: a small installation on the	FUT
5,500 km or 3,500 miles) ballistic missile		Moon, equivalent to a port fortress.	
typically designed for nuclear weapons		Mag-Lev: Magnetic levitation, the process	FUT
delivery, i.e., delivering one or more nuclear		by which an object is suspended above	
warheads. It uses a ballistic trajectory		another object by magnetic fields. The	
involving a significant ascent and descent,		electromagnetic force is used to counteract	
including sub-orbital flight.		the effects of the gravitational force. Mag-	
Interplanetary Transport Network: A set	FUT	Lev systems are particularly attractive for use	
of transfer orbits between various planets		on the Moon as there is no atmosphere on	
and moons in the solar system. These		the surface to slow down the train.	FUT
transfers have particularly low delta-v requirements, and appear to be the lowest		Maria: The lightly cratered basaltic plains of the Moon concentrated on the Nearside.	FUI
energy transfers.		Mass-Driver: A magnetically accelerated	FUT
Kinetic Energy Weapon: (KEW) Usually	FUT	mag-lev rail used to accelerate cargo from	101
an inert projectile launched either from a		the Lunar surface to be picked up from orbit	
lunar mass-driver, an orbital coilgun or from		or elsewhere in Earth-Moon space. A mass-	
Earth orbit, where the destructive force		driver can also be used as a cheap way of	
comes from the kinetic energy of the		moving an asteroid to a useful location by	
projectile impacting at very high velocity.		using the dust and rock of the asteroid itself	
The largest releases energy on impact with		as reaction mass.	
the ground comparable to a small nuclear		Mercantile Construction: The capability of	ME
weapon (without the radioactive fallout) or		Industrial Merchant Houses to build units	
very large conventional bomb.	יייי	outside their HBZ.	ME
Lagrange Points: Five positions in	FUT	Merchant Agent: The initial level of	ME
interplanetary space where a small object affected only by gravity can theoretically be		business interest that a Merchant House can maintain in a city or region.	
stationary relative to two larger objects (such		Merchant Factory: The representative of a	ME
as a satellite with respect to the Earth and		Merchant House in a specific location	WILL
Moon). They are analogous to		(usually a port city). Represents a degree of	
geosynchronous orbits in that they allow an		local interest and market control.	
object to be in a "fixed" position in space		Merchant House: A new kind of nation	ME
rather than an orbit in which its relative		devoted to the discovery and economic	
position changes continuously.		exploitation of new markets, continents and	
Lander: Type of spacecraft which descends	FUT	trade routes.	

Term & Definition	Rule Book	Term & Definition	Rule Book
Merchant Shipping Points (MSPs):	BR	Quality Rating (QR): a measure, on a scale	BR
Representation of the actual trade ships used	DК	of 0 (worst) to the maximum per tech level,	DK
to move goods. Created by each Nation and		of the level of advancement of your military.	
Merchant House to carry their trade.		QR's exist for each kind of unit that you can	
Misinformation: Information that is	FUT	build in your military.	
incorrect, but not because of any intentional	101	Railroads: A new Megalithic Construction	ME
attempt to mislead.		Project for Renaissance (TL 11) and	1.11
Monopoly: A trade concession or resource	ME	Industrial nations, allowing them to ship	
solely controlled by a Merchant House,	<u></u>	units and goods much more quickly.	
usually at the expense of the nation that		Region : a geographic area used to control	BR
normally has access to it.		movement of armies and Leaders across the	
Moon Base: A large permanent habitat on	FUT	planet.	
the Moon, usually at least part dug into the		Regolith : A layer of loose, heterogeneous	FUT
lunar regolith. Effectively a port city on the		material covering solid rock. On the Moon,	
Moon, the base can host lunar mass-drivers.		regolith has been formed by the action of	
Multiple Independently targetable Re-	FUT	micro-meteroids breaking down surface	
entry Vehicle: (MIRV) A re-entry vehicle		rocks into a powder.	
which is a collection of nuclear warheads		Research Projects A form of investment	ME
carried on a single ICBM. Using a MIRV		for Industrial nations, allowing them to	
warhead, a single launched missile can strike		develop new kinds of units, factories and	
several targets, or fewer targets redundantly.		capabilities (once they have achieved certain
